## **SPSA TO BEGIN RECORDING “TARE” WEIGHT**

(Chesapeake, VA June 24, 2010) RECORDING “TARE” WEIGHT PROCESS FOR VEHICLES

All customers using the transfer stations of the Southeastern Public Service Authority are advised that beginning July 1, 2010, SPSA will begin the process of updating tare weights on vehicles using our facilities to dispose of solid waste. This will be an ongoing process throughout the year.

Drivers may be required to drop containers, trailers and/or remove any additional equipment that they would not normally carry.

Additional time will likely be required at the transfer station scales during this process. SPSA will do everything possible to minimize your delay time.

Your patience and understanding are appreciated.
